EDUCATION

University of Georgia | Athens, GA — Aug 2024 - May 2028

Bachelor of Science, Computer Science; Major GPA: 4.00

Honors: Zell Miller Scholar (Full Tuition); Dean's List; Undergraduate Research Grant (2025)

Relevant coursework: Data Structures & Algorithms, System Programming, Machine Learning, Statistics & Probability, Object-Oriented Programming, Linear Algebra

SKILLS

Programming Languages: Python, Java, C++, C, SQL, MATLAB

Machine Learning & Data Engineering: PyTorch, scikit-learn, Pandas, NumPy, OpenAI API, LLMs, ETL Pipelines, Snowflake

Software Engineering & Cloud: React, FastAPI, Flask, REST APIs, Azure, AWS, Supabase, Git, GitHub

TECHNICAL EXPERIENCE

Investment Operations Intern | Franklin Templeton — May 2026 - Present

- Automated a Python ETL pipeline from Snowflake, cutting data processing time by 45% across 12 recurring reports
- Partnered with onshore and offshore teams to standardize reusable Python data extraction and export modules

Undergraduate Research Assistant - AI/ML | University of Georgia — Jul 2025 - May 2026

- Designed LLM-powered agent workflows to classify blood-cell clusters and automate biomarker generation
- Built Python training pipelines (Pandas, PyTorch, scikit-learn) for experimental datasets and improving data quality

Gameday Student Ambassador | University of Georgia — Jul 2025 - May 2026

- Supported 240+ VIP guests; automated team workflows to cut response time by 20% during high volume game-day operations

PROJECTS

DogArmor | Co-Founder, Full-Stack + ML — May 2025 - Present

- Engineered a production AI platform to deliver personalized dog gear recommendations using YOLO pose-estimation
- Architected a scalable RESTful backend (Flask, Azure) and front end with real-time data pipelines for recommendations

AI Interview + System Design Simulator | Full-Stack + AI — Mar 2026 - May 2026

- Built a full-stack AI interview platform covering system design, backend/frontend, behavioral, and product rounds using FAANG-style scoring rubrics
- Implemented adaptive question generation, architecture bottleneck detection, structured feedback, and Mermaid.js visualizations for production-scale design practice

AI Sketch Mentor | Full-Stack SaaS — Jan 2026 - Feb 2026

- Launched an AI coaching platform using vision models to deliver structured sketch feedback on anatomy, shading, and composition
- Shipped a full-stack SaaS app (React, FastAPI, Supabase, OpenAI) with progress tracking and streak-based engagement loops

Weather and Event Widget | Developer — Apr 2025 - May 2025

- Built a multithreaded Java application integrating OpenWeatherMap and Ticketmaster APIs to deliver real-time weather insights and event recommendations
- Designed a reliable data pipeline with async API calls, reducing response time by 35%

LEADERSHIP & IMPACT

Founder & Mentor | Action for the Climate Emergency (ACE) Georgia — Sep 2021 - Present

- Recruited and scaled Georgia chapter to 200+ members from the ground up; directed 22 community cleanup initiatives and introduced recyclable programs across 28 school cafeterias
